Cybersecurity Awareness and Workshop Saint Louis College, City of San Fernando, La Union	April 2025
IT Careers and Opportunities University of the Philippines Information Technology Development Center (UPITDC), Quezon City, Manila	March 2025
Startup & Design Thinking Seminar Saint Louis College, City of San Fernando, La Union	February 2025

Projects

NFA Interactive Information Kiosk National Food Authority (NFA) – Regional Office I <i>On-the-Job Training Project</i>	February 2026 – June 2026
Created a touch-friendly public kiosk that displays real-time announcements, media galleries, and videos, with responsive features like zoomable Citizen’s Charter views, interactive org charts, and animated content.	

- Developed content management modules with full CRUD for updates, staff directories, and GAD showcases, plus secure admin tools for bulk uploads, drag-and-drop organization, and efficient asset handling.
- Implemented user account and system configuration management with Laravel Sanctum to provide secure sessions and protected administrative access.

Internship ProjeSight (Project Locator)

February 2026 – June 2026

National Food Authority (NFA) – Regional Office I | *On-the-Job Training Project*

- Developed an interactive, responsive GIS mapping system using React-Leaflet with enterprise-grade UI design, fluid navigation, and deep-linking.
- Built secure full-stack functionalities including JWT authentication, role-based access control, optimized SQL database queries, and multi-file image uploads.
- Implemented advanced data management features for real-time search, sorting, activity auditing, and automated PDF report generation.

SHERCLE: A mobile-based SOS and Community Support System

March 2026

e-Gov Competition Entry

- Programmed the mobile UI/UX, implementing intuitive interfaces tailored for emergency response and community safety features.

AgriLAKO: Agricultural E-Commerce System for La Union Sellers and Buyers

March 2025 – December 2025

Capstone Project

- Programmed a web-based admin system for the Office of the Provincial Agriculturist (OPAG) to manage agricultural data and cooperative activities.
- Developed a mobile application for sellers and buyers in La Union to handle product listings, orders, and transaction tracking.
- Collaborated with government staff and local cooperatives to test, debug, and align system features with real-world needs.

Achievements

7th eGov Awards 2026 - Women in STEM Summit

City of San Fernando, La Union

- SHERCLE *1st Runner-Up (2nd Place)*
 - A mobile-based SOS and Community Support System featuring emergency alerts, live location sharing, and incident reporting to improve community safety and emergency response coordination.

Provincial Application and Tool for Citizens Hackathon 2025 (PATCH)

City of San Fernando, La Union

- AGRILAKO (Most Viable Product) – *3rd Place*
 - A mobile and web e-commerce platform enabling farmer cooperatives to directly market and sell their products to consumers and businesses.
